NIVIS ISA100.11a DEVELOPMENT KIT

Fast track your ISA100.11a product to market. The ISA100.11a kit allows developers, integrators, users and OEMs to integrate their application to the ISA100.11a more quickly and with less internal effort.

- Provides wireless monitoring and control over a highly-reliable, standards-based network for a wide variety of industrial and commercial applications.
- Nivis system architecture supports both ISA100.11a and WirelessHART, either independently or simultaneously.
- End-to-end solution: backbone router, gateway, system and security manager processes.
- Often more secure than wired networks

The world leader in secure, open standards wireless sensing and control networks.
