

ISA100.11a Device Interoperability Test Kit

Description

The ISA100.11a Device Interoperability Test Kit is a complete package that allows the user to ensure a manufacturer's device conforms to WCI's official ISA100.11a registration testing. This product will verify the correct communication behavior of a wireless device as defined in the ISA100.11a standard. It is an excellent tool for troubleshooting, debugging, and regression testing of ISA100.11a products.

Features

- Ensures ISA100.11a device interoperability in native mode, in conjunction with ISA100.11a Stack Conformance Test Kit.

Components

- Script Server and software
- Test script source code and technical documentation
- Diagnostic Backbone Router
- Reference Device Under Test
- Ethernet router

System requirements

- PC with web browser

Part Warranty

- One (1) year from date of delivery

About the ISA100 Wireless Compliance Institute

Comprised of industry leaders from major manufacturing and automation control system users and suppliers, the ISA100 Wireless Compliance Institute (WCI) was formed to decrease the time, costs, and risks of developing and deploying standards-based, industrial wireless devices and systems. WCI has established a collaborative industry-based program among users, suppliers, and other stakeholders that conducts independent testing and certification of wireless devices and systems; provides education, tools, and technical support to users and suppliers; accelerates adoption of the ISA100 standards; and assures interoperability. For more information about the ISA100 Wireless Compliance Institute, visit www.isa.org/isa100compliant.
