

## ISA100.11a Device Interoperability Test Kit Generation 2

### Description

The ISA100 Wireless Device Interoperability Test Kit (DTK) Generation 2 is a complete package that allows the user to ensure a manufacturer's device conforms to WCI's official ISA100 Wireless registration testing. This product will verify the correct communication behavior of a wireless device as defined in the ISA100 Wireless® implementation specification version W2-01. It is an excellent tool for troubleshooting, debugging, and regression testing of ISA100.11a products.

The DTK ensures ISA100.11a device interoperability in native mode, in conjunction with ISA100.11a Stack Conformance Test Kit (STK).

### Components

- Script Server (Linux machine)
- Test Scripts
- Diagnostic Backbone router (D-BBR)
- iBoot
- Ethernet Hub
- Documentation
- Technical Support for DTK setup and usage
- Part Warranty - one (1) year

Technical documentation is preloaded on the WCI Script Server, also available as a download on WCI's GitHub portal, as well as via Centero website.

### About the ISA100 Wireless Compliance Institute

Comprised of industry leaders from major manufacturing and automation control system users and suppliers, the ISA100 Wireless Compliance Institute (WCI) was formed to decrease the time, costs, and risks of developing and deploying standards-based, industrial wireless devices and systems. WCI has established a collaborative industry-based program among users, suppliers, and other stakeholders that conducts independent testing and certification of wireless devices and systems; provides education, tools, and technical support to users and suppliers; accelerates adoption of the ISA100 standards; and assures interoperability. For more information about the ISA100 Wireless Compliance Institute, visit <http://www.isa100wci.org>.
